

Station Practice

Meet your GP practice team

Our team of great professionals looking after you.

Receptionist

First point of contact the reception team are trained and trusted to offer you the most appropriate service or professional to help you. They may have to ask you for more information in order to do so.

Health Care Assistant

HCAs provide vital services in the practice taking bloods, giving ECGs, administering vaccines, dressing wounds and removing stitches/sutures

Admin/Care coordinators

Our admin consists of Prescription clerks who process our prescriptions and any queries. Medical secretary's who process our referrals, any requests received from outside agencies such as insurance report, DWP, DVLA and more. We have a complaints lead, workflow team who process all clinical correspondence received as well as care coordinators for safeguarding, vulnerable, palliative care and end of life patients.

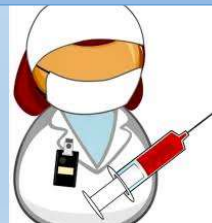

GP

Your primary care GPs treat all common medical conditions and can refer to hospitals and other medical specialists for treatment. They focus on health combining physical, psychological & social aspects of care

Advanced nurse practitioner

We currently have at least two ANPs providing appointments to our patients. Advanced nurse practitioners are able to independently diagnosis, prescribe, refer to other health specialists and manage most health conditions.

Phlebotomist

Here at the practice our phlebotomist has appointments daily for blood tests.

Physiotherapist

Our in house physiotherapist will be able to assist you here at the surgery with any musculoskeletal pain/problems and provide you with management for your problem. An appointment can be booked via our reception team.

Practice Nurse

As well as administering injections, providing wound care delivering childhood immunisations, Practice nurses are qualified in a range of specialities including diabetes management, respiratory conditions & women's health.

Mental Health Nurse

Our mental health nurse offers appointments daily providing mental health support and signposting to other relevant services for help and management

Pharmacist

Our pharmacists can provide quick and efficient solutions to prescription queries as well as carrying out medication reviews for patients with ongoing health problems and counselling on new medications.
