

Dear Patients,

Please note, this practice has been accredited as being suitable for the training of Foundation Year 2 (FY2) doctors.

This means the practice and doctors have achieved a number of standards which have been assessed by *Health Education England Kent, Surrey and Sussex (HEKSS)*, acting on behalf of the General Medical Council (GMC).

These Qualified doctors are gaining experience of General Practice before finalising their career specialty pathway. These doctors will have slightly longer consultation times.

If you prefer to see one of our regular GPs and not see the FY2 please let the reception staff know.

Sometimes other doctors and NHS professionals are trained and supported in the practice: this may include student nurses, pharmacists or physicians associates as well as doctors who are training to be GPs.

We hope you would support the training of doctors and other NHS professionals.
